Office Action Summary

Art Unit: 2839

The restriction requirement is modified; claims 1-13 and species of figs 1-6 are joined for examination. Fig 7 remains a non-elected species. Applicant is asked to list any claims directed to figure 7.

Spec. Page 10, lines 16, 21 "18" should be --18c--.

Claim 1, lines 10, 11 "installation" is incorrect; should it be --installed--? See line 6.

Abstract is objected to as unclear. It should be rewritten to clearly set forth the invention in a more understandable manner, to refer to "ferrite beads", to fig 6 molded cover and to fig. 7 snap on cover, and that the supports or covers include openings for frictionally fitting over leads of a circuit component to secure them in place.

Title "in association with" should be changed to --onto-- or --over--.

Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamoto in view of France)

It would have been obvious to form Sakamoto inductor 25 in the manner of that of France at 10. This would help to maintain the inductor in place during manufacture.

Claims 11 and 12 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over France.

The recited inductor is shown by France at 10. Recited use does not overcome such device where structure of claimed device is shown. Also wire 12 is read as a rod.

Claims 8-10 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vander Heyden.

• Art Unit: 2839

The Vander Heyden assembly (see fig 3) includes toroidal element 40 and flexible support 38 fitted over rod 10a and retaining the toroid in place. For claim 13, obvious to mount the parts in the recited manner.

Claims 1-7 are allowed.

Any inquiry concerning this communication should be directed to N Abrams at telephone number (703) 308-1729.
